**Subject:** Clarification of the requirements of the Spill Control Plan under Section 5.4 of the RD Work Plan  
  
**Categories:** 11-19 to 1-10 2014

Barbara,

The model RD/RA Scope of work used by EPA to prepare Unilateral Order includes air monitoring and dust control under the Spill Control Plan. EPA's UAO was not specific that this is where this requirement falls, and FMC's Work Plan is not specific as to where they will address this requirement.

Assuming that FMC agrees that dust control and air monitoring are a requirement in this earth moving remedial action, and they will prepare their plan either separately or in the Spill Control Plan, no change to the Work Plan will be required.

Kevin Rochlin
